

Empower Your Fleet with AI

Round out your FleetLocate telematics solution with Absolute Wireless FL Dashcam. This future-proof dual camera powered by SurfSight, from Lytx, is available as an add-on to any existing FleetLocate devices in the field, or to Spireon's FL360 universal tracking device.

It leverages AI technology to detect unsafe driving and trigger in-cab driver alerts, ultimately coaching drivers to avoid accidents and improve overall safety. Fleet managers have full access to their video feed with Live View and historical video segments retrieved and stored on the cloud.

FL Dashcam Benefits:

Reduce Liability Risk

Motor vehicle crashes cost employers \$60 billion annually in medical care, legal expenses, property damage, and lost productivity.¹ Firsthand video evidence can be used to mitigate risk with data around accidents and theft, as well as protect against fraudulent claims.

Encourage Safe Driving

Distracted driving causes an estimated 400,000 injuries per year.² Your drivers will drive more cautiously knowing they are being recorded. Automatic alerts will also notify them of any risky driving behavior to keep them attentive.

Reduce Insurance Premiums

Some insurers recognize the benefits of a dashcam and can lower your insurance premium.

Reduce Cost of Claims

One customer saw a savings of \$20K in the first two months of implementation.

Key Features:

- Dual Camera - Forward and in-cab facing, with IR for nighttime use
- Install - OBDII or Wired
- In-cab Driver Alerts - Visual and Audio
- Tamper Resistant
- Distracted driving events
- Driver initiated Recording
- Live video streaming from dual, road-facing and driver-facing cameras, provides real-time insights across fleet *
- Access to historical recordings
- Full integration into the FleetLocate Experience
- LTE connectivity
