

# Any Fleet. Any Vehicle Type. Universal tracking at your fingertips.

Whether you're responsible for 20 or 2,000 drivers, light or heavy-duty vehicles, or anything in between — FleetLocate by AWI offers a fleet telematics solution tailored to fit your needs. Get the leading IoT solution for location information, analytics, and actionable insights on your assets and drivers in real time.

Introducing the new FL360 by AWI. The FL360 is a modular GPS tracking device offered as the latest release from the FleetLocate solution portfolio. This robust solution supports all vehicle types, plug-and-play or covert installation, and enables advanced features and diagnostics. Access key insights via our mobile app or web based portal.

For an even more comprehensive view, add on our FL Dashcam solution. This future-proof dual camera powered by Surfsight, from Lytx, leverages AI technology to detect unsafe driving and trigger in-cab driver alerts, ultimately coaching drivers to avoid accidents and improve overall safety.

## FL360 BENEFITS:

### Fleet Management

Increase dispatch efficiencies, reduce vehicle misuse, improve customer service, and drive revenue. Accommodate new business opportunities by adding stops on the fly to the closest driver.

### Trailer and Asset Management

Reduce detention time, automate yard checks and maintenance, improve driver satisfaction, increase trailer and asset utilization, and get your assets back to work faster.

### Monitor Driver Behavior

Identify and reduce risky and costly driver behaviors, such as speeding, harsh braking, and excessive idling to lower insurance costs and fuel consumption.

### Proactively Maintain Your Fleet

Get ahead of vehicle service with advanced engine diagnostics. Avoid downtime and maintain a healthy fleet through alerts triggered by engine fault codes.

### Stay Compliant

Ensure compliance with federal regulations such as FMCSA 395.15, the ELD mandate, and the Food Safety Modernization Act.

# Features

## CORE FEATURES

The screenshot displays the FleetLocate web interface with a sidebar menu on the left and a main content area divided into several feature modules:

- Reports:** A list of report types and filters.
- Dashboard:** A central overview with charts and maps.
- Maintenance:** A detailed view of a vehicle's maintenance schedule.
- Alerts:** A notification for a DTC (Diagnostic Trouble Code) alert.
- Scorecard:** A 'Driver Scorecard - Settings' page with sliders for speed and throttle.
- Compliance:** A 'Summary' page showing compliance statistics (e.g., 17, 0, 1, 0, 14).
- Safety Tab:** A 'Full Audit' page with checkboxes for various safety features.

## ADVANCED FEATURES

This section highlights advanced capabilities:

- True Odometer, True Engine Hours, Engine DTC, Engine Oil Life, Fuel Level, Seatbelt:** Represented by individual icons.
- Advanced Tracking:** A map showing a route through the Terrocal Valley and Lake Mathews Estelle Mountain Reserve, with a '30 Second Reporting' feature.
- Driver Mobile App:** A smartphone interface showing a 'Driving Score' of 88 and a list of safety events.
